Wood – deer, squirrel, wolf Lake – otter, frog, heron Field – harvest mouse, hare, mole

### **Activity Sheet 5**

Left to right: beetle, grub, millipede

#### Food chain:

#### **Activity Sheet 6**

Where would you find these Minibeasts? Under a rock

How do you know? These minibeasts either have flat bodies (like woodlice) or slimy, flexible bodies (like slugs), so they can squeeze into narrow spaces.

Minibeasts that live in trees often have wings or legs for modified for climbing (such as butterflies, crickets and beetles)

Minibeasts that live in water often have snorkels (breathing tubes) or legs modified for swimming (such as water boatmen, baby mosquitos and water beetles)

# Activity Sheet 7

PRODUCER	PREY	PREDATOR
Wheat	Mouse	Owl
Seaweed	Crab	Otter
Leaf	Caterpillar	Ant
